

QUALITY POLICY

Guided by ethical principles and social responsibility, our priority is to prevent pollution of the air, soil, water, and other natural resources, and to ensure the efficient use of natural resources, while prioritizing the safety of our employees. We operate with the understanding that our production, which is based on the training of our employees, also raises awareness among our stakeholders

We view improving the performance of the quality management system and complying with the requirements of the quality management system as a risk-based approach and as an implementer.

We develop our progress with an understanding that meets customer satisfaction and expectations in parallel with the law and other requirements. Our primary goal is to produce safe and high-quality abrasive wheels that comply with national and international standards.

Our leadership mindset and pioneering spirit are our foremost priorities.
